The Storz & Bickel Volcano Hybrid merges balloon and classic whip-style inhalation into one dynamic desktop vaporizer. Taking the place of the Volcano Digit, this state-of-the-art innovation features an improved double helix heat exchanger and a heat-up time that's 10-times faster.

The Hybrid enables you to draw from the valve balloon system by switching on the built-in air pump; the rotatable tube provides a secondary inhalation option with minimal airflow resistance and quieter draws. A powerful 100-watt heater pushes air through the vapor path and delivers smooth, flavorful vapor without combustion.

Explore the full flavor spectrum of your dry herb with precise temperature control that ranges from 104 °F to 446 °F. The LED displays real-time feedback as it climbs to your chosen temperature. The Hybrid is equipped with convenient app compatibility that lets you easily manage your sessions from your phone.
